Hi Dick

here's the info on surface water that I sent to the Parkers last year.

Note the web page info is old, we have a new link and password. The attached table is really what you want.

Bonnie

Subject: OU3 information for Mr. and Mrs. Parker

---

Dear Linda,

Rebecca let me know that Mr. and Mrs. Parker are interested in seeing available OU3 data on the levels of LA measured in Rainy Creek.  
Please let them know that they can find this (and all kinds of other OU3 information) on the OU3 webpage. Here's how:

1. Go to the webpage with this link, user name , and password:

<http://www.newfields.com/dl/libby/>

user name: libby

password: newfields

2. Go to the section "Sampling and Analysis Plans"

3. Find the "Phase III SAP" and click on the link for "Appendix A - Phase II Data".  
This will take you to several summary tables - open up the one named Phase IIA Data - it has all available data for surface water and sediment.

The sampling station at Rainy Creek and the Kootenai River is "LRC-6".

Also, here's a copy of the table, if that's easier:

Phase IIA Result Summary.xls

If the Parkers or anyone else needs information about OU3, you can always give out the webpage information or please have them contact me directly. Thanks.
